

Psych Labs: Visual Search Experiment — Data Sheet

Name of Student Participant _____ Section _____

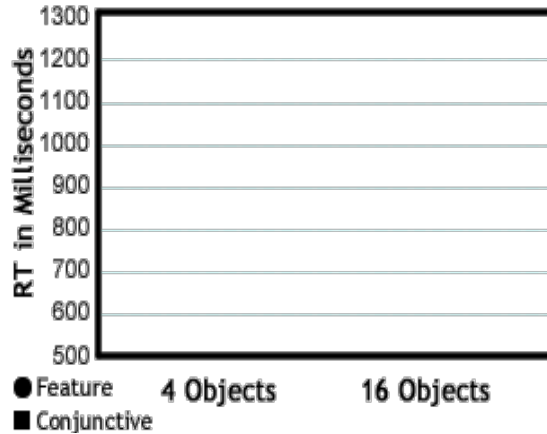

Instructions: When you reach the Results page at the end of the experiment session, copy your own results into the data tables in the top portion of the page. Then plot your *own RT results* as **bar graphs** (on left, using the two values for Overall RT) and **line graphs** (on right, using the four RT values for 4 and 16 objects). When the pooled results are available, plot the two graphs at the bottom of the page. **If your millisecond RT values don't fit the range of RT values on the vertical axis, cross out those values and label the right edge of the of each graph with an appropriate range of RT values.**

Mean RT	Single Feature	Conjunctive Features	All	Percent Correct	Single Feature	Conjunctive Features	All
4 Objects				4 Objects			
16 Objects				16 Objects			
Overall				Overall			

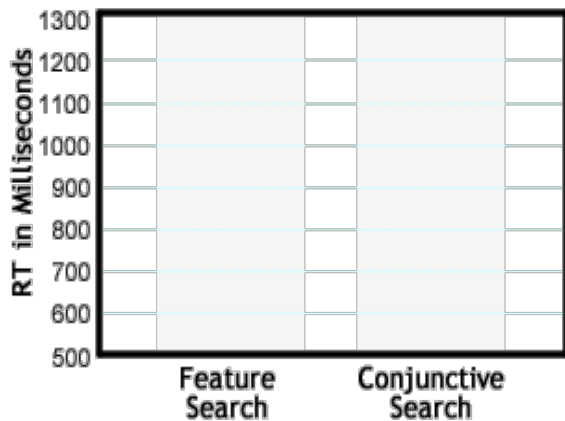

Your Results: Overall RT

Your Results: RT by Condition

Pooled Results: Overall RT

Pooled Results: RT by Condition
